The small engine CAN Bus instrument is a complete solution for the small engine CAN bus market. This compact instrument provides a single source view of the critical information provided by the engine ECU.

A large sun-light readable LCD provides all of the information an operator will need at a quick glance. Super-bright LEDs signal the operator when there is a fault and requires action.

Faria has a long history of working with CAN bus engines. Let our experience work for you.

Features

- Sun-light readable display
- Super-Bright LED warning lights and audible alarms
- Compact size
- Available in our Snap-In mounting system
- Analog / Switched inputs available
- Weather resistant connectors
- Environmentally sealed enclosure
