

Digital Dash

The Digital Dash kit offer a complete set of digital gauges ready to install.

The Digital Dash kit digital gauge set is an easy to use Analog style instrument, with advanced ECU monitoring capabilities demanded by today's leading engine manufacturers.

The digital instrumentation communicates directly with the NMEA 2000 and SmartCraft protocols used by the engine ECU providing an important link between the operator and the engine ECU. With just a push of a button the operator can tell the status of the health of the engine including diagnostic messages, fault alerts, and parameter information. The Digital Dash kit from Faria is a great value for those boat owners looking to upgrade the instruments on their boat with American Made, OEM drop in replacements.

Basic Set - KFT032 (NMEA 2000) KTF042 (SmartCraft)

MG3000 7000 RPM Tachometer - 4-inch (3.375" dia. hole)

The MG3000 Tachometer features large lighted buttons with tactile feedback, LED back lighted dial, fog-resistant polycarbonate lens and plug and play connectorized cases. The daylight readable LCD is visible even in direct sunlight. A user-friendly, intuitive design makes navigating the menu interface easy to use. Customize the MG3000 with user definable screens and alarms.

The MG3000 Tachometer connects to the CAN bus and communicates directly with the engine ECU. Engine data, fault codes and alarms are displayed on the Tachometer's LCD display*.

The MG3000 Tachometer is so much more than just a digital repeater. There are 3 Analog inputs which can be used for Air Temperature, Trim, Fuel Level and Water Pressure and a NMEA 0183 input for a GPS antenna for Lat/Long, Heading, COG and clock.

MG1000 60 MPH Speedometer - 4-inch (3.375" dia. hole)

The MG1000 Speedometer connects directly to the MG3000 Tachometer. This plug-and-play connection connects the Speedometer directly to the CAN bus. Like the Tachometer the Speedometer has the look and function of an analog gauge, but the pointer is driven with a digital stepper motor for increased accuracy. Speed from CAN bus, GPS or connected Paddle wheel available.

*Note: Some proprietary engine manufacturer alarms may not display or may be displayed incorrectly.

4 Gauge Box Set - KFT034 (NMEA 2000) KTF043 (SmartCraft)

MG3000 7000 RPM Tachometer - 4-inch (3.375" dia. hole)

MG1000 60 MPH Speedometer - 4-inch (3.375" dia. hole)

Digital Trim and Water Pressure gauges 2-inch (2.0625" dia. hole)

The discrete Digital Trim and Water Pressure gauges connect directly to the MG3000 Tachometer. Digital signals are processed by the engine and sent through the Tachometer providing an easy to use display of the information. The stepper motor driven pointer provides accurate feedback of Trim and Water Pressure reported by the engine ECU.

Harnesses Available -

- KTF035 - Honda Marine - Engine to Backbone Harness
- KTF033 - Suzuki - Engine to Backbone Harness
- KTF138 - Mini NMEA 2000 Backbone Harness
- KTF044 - Mini SmartCraft Backbone Harness
